Table of Contents

1 Introduction

2 STOXX Europe 600

3 STOXX Europe 600 ESG-X

4 STOXX Europe 600 SRI

Introduction

The STOXX® Europe 600 Index was launched in June 1998 as a broad and liquid measure of the European market.

The index offers comprehensive coverage across country and industry allocations to Europe's developed economies, replicating almost 90% of the underlying investable market.

In addition to large cap exposure, the STOXX Europe 600 also covers mid- and small-cap securities capturing their historical return premia.

The STOXX Europe 600 Index has evolved to be used as the universe to measure specific market segments such as region, size, ICB sectors, Factors, ESG, Low Carbon, PAB & CTB and most recently Biodiversity.

There is a strong ecosystem supporting the index family with many ETFs and passive funds available as well as a vast portfolio of exchange-traded derivatives.

STOXX Europe 600

Key Index Features

Universe	Developed Europe
Weighting scheme	Free-float market capitalization
Weighting cap factors	20% on a component level
Base value and date	100 on December 31, 1991
Index types and currencies	Price, net return and gross return in EUR and USD
Review frequency	Quarterly on third Friday of March, June, September and December
Selection list	Most liquid security considered, 3M-ADTV > EUR 1m
Fast exit, Fast entry	Not applicable

STOXX Europe 600

Index Construction

Step 1: STOXX TMI's for developed countries in Europe

- Generate STOXX Total Market Index ("TMI") for all developed markets in Europe. For each country
 - **Rank** stocks by free-float market cap
 - **Select** 95% largest¹⁾
 - **Weight** selected stocks by free-float market cap

Step 2: STOXX Europe 600

- Aggregate Country TMIs for developed Europe
 - **Rank** stocks by free-float market cap
 - **Select** largest 600¹⁾ having a minimum liquidity
 - **Weight** selected stocks by free-float market cap²⁾

Simple, transparent, fully rules-based index construction

STOXX Europe 600 consists of stocks from **17 developed European countries**

Ranking and weighting by **free-float market cap**

Stocks must have a **minimum liquidity** of greater than one million EUR measured over 3-month average daily trading volume

¹⁾ Simple buffer rule applies upon quarterly rebalancing

²⁾ Technically, there is a cap of 20% at component level. Yet with a largest stock weight of typically around 2% this cap has no practical relevance

STOXX Europe 600

Buffer Rule

Index Name	Components	Upper Buffer	Lower Buffer
STOXX Europe 600 Index	600	550	750

- For the STOXX Europe 600 Index the largest 550 stocks (upper buffer) on the selection list qualify for selection
- The remaining 50 stocks (components needed minus the upper buffer) are selected from the largest remaining current components ranked between 551 and 750 (lower buffer)
- If the number of stocks selected is still below 600, the largest remaining stocks are selected until there are enough stocks

STOXX Europe Index Family

STOXX Europe 600 – Barometer for Overall European Market Sentiment

1) Effective September 2020 review, ICB 2 is replaced by ICB 5 consisting of 11 Industries, 20 Supersectors, 45 Sectors, 173 subsectors. See STOXX Index Methodology Guide for details.

About STOXX & Disclaimer

About STOXX

STOXX® and DAX® indices comprise a global and comprehensive family of more than 17,000 strictly rules-based and transparent indices. Best known for the leading European equity indices EURO STOXX 50®, STOXX® Europe 600 and DAX®, the portfolio of index solutions consists of total market, benchmark, blue-chip, sustainability, thematic and factor-based indices covering a complete set of world, regional and country markets.

STOXX and DAX indices are licensed to more than 550 companies around the world for benchmarking purposes and as underlyings for ETFs, futures and options, structured products, and passively managed investment funds.

STOXX Ltd., part of Deutsche Boerse Group, is the administrator of the STOXX and DAX indices under the European Benchmark Regulation.
